× 17: the scan and 16 bootstrap replicates, each through the whole pipeline
One scan
DWI + reversed b0
Bootstrap replicate
wild bootstrap, smooth signs (FWHM 4 voxels)
Field re-estimated
susceptibility field from the b0 pair
UKF tracking
b = 2000 shell
RapidParc
42 named tracts + Other
17-run ensemble
votes (0–17) per seed, voxel and point
Map for this protocol?
yes
no
Recalibration map
8 test-retest subjects (MASiVar cIII); validated leave-one-subject-out
Calibrated
P(rescan, same session)
